

# BAG AND CLIP TRANSPORTER

<b>Item #:</b>
<b>Project:</b>
<b>Quantity:</b>

## PRODUCT OVERVIEW

Bag & Clip Transporters are customized transporting system using clips to carry bags containing food products from a loading point to a remote delivery point, either on the same floor or on a different level. Track system is typically suspended under the ceiling or enclosed above the ceiling.

## STANDARD PRODUCT FEATURES

- Aluminum, stainless steel, and plastic design ensures easy cleaning and maintenance
- Customized design to best suit the unique project requirement - enable a challenging site layout, build "to go" kiosks at street level or limit DT footprint.
- Efficient and hygienic delivery system moves multiple products between building floors within seconds
- Modular track design ensure flexibility to meet any site conditions and ease of installation
- Lightweight design and low-power motor reduces power consumption
- Built-in safety features and emergency shut-off system ensure safe operation of system at all times
- Includes spare parts box with critical parts for peace of mind
